3.9 SOC 2 Type II Audit Report

This section applies to the Contractor and any relevant subcontractor who provides services for the Department's identified critical functions, handles Sensitive Data, and/or hosts any related implemented system for the State under the Contract. For purposes of this section, "relevant subcontractor" includes any subcontractor that assists the Contractor in the critical functions of the Contract, handles Sensitive Data, and/or assists with any related implemented system, excluding subcontractors that provide secondary services that are not pertinent to assisting the Contractor in the critical functions of the Contract, handling Sensitive Data, and/or assisting with any related implemented system.

The Contractor shall have an annual audit performed, by an independent audit firm of the Contractor's choosing, of the Contractor's and any relevant subcontractor's handling of Sensitive Data and the Department's critical functions, which are identified as Section 3.2 – Scope of Work - Requirements, and shall address all areas relating to Information Technology security and operational processes (see IFB Section 3.3). These services provided by the Contractor and any relevant subcontractor that shall be covered by the audit will collectively be referred to as the "Information Functions and/or Processes." Such audits shall be performed in accordance with audit guidance: *Reporting on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy (SOC 2)* as published by the American Institute of Certified Public Accountants (AICPA) and as updated from time to time, or according to the most current audit guidance promulgated by the AICPA or similarly-recognized professional organization, as agreed to by the Department, to assess the security of outsourced client functions or data (collectively, the "Guidance") as follows:

3.9.1 The type of audit to be performed in accordance with the Guidance is a SOC 2 Type 2 Audit (referred to as the "SOC 2 Audit" or "SOC 2 Report"). The initial SOC 2 Audit shall be scheduled and completed within a timeframe to be specified by the Contract Monitor. All subsequent SOC 2 Audits that are arranged after this initial audit shall be performed on annual basis and submitted to the Contract Monitor for the preceding calendar year.

3.9.2 The SOC 2 Audit shall report on the Contractor's and any relevant subcontractor's system(s) and the suitability of the design and operating effectiveness of controls of the Information Functions and/or Processes to meet the requirements of the Contract, including the Security Requirements identified in Section 3.3, relevant to the following trust principles: Security, Confidentiality, and Privacy, as defined in the aforementioned Guidance. The audit scope of each year's SOC 2 Report may need to be adjusted (including the inclusion or omission of the relevant trust services principles of Security, Availability, Confidentiality, Processing Integrity, and/or Privacy) to accommodate any changes to the Contractor's and any relevant subcontractor's environment since the previous SOC 2 Report. Such changes may include but are not limited to the addition of Information Functions and/or Processes through modifications to the Contract, or due to changes in information technology or operational infrastructure implemented by the Contractor and/or subcontractor. The Contractor and any relevant subcontractor shall ensure that the audit scope of each year's SOC 2 Report engagement shall accommodate these changes by including in the SOC 2 Report all appropriate controls related to the current environment supporting the Information Functions and/or Processes, including those controls required by the Contract.

3.9.3 The audit scope of each year's SOC 2 Report may need to be adjusted (including the inclusion or omission of the relevant trust services principles of Security, Availability, Confidentiality, Processing Integrity, and/or Privacy) to accommodate any changes to the Contractor's and any relevant subcontractor's environment since the previous SOC 2 Report. Such changes may include but are not limited to the addition of Information Functions and/or Processes through

modifications to the Contract, or due to changes in information technology or operational infrastructure implemented by the Contractor and/or subcontractor. The Contractor and any relevant subcontractor shall ensure that the audit scope of each year's SOC 2 Report engagement shall accommodate these changes by including in the SOC 2 Report all appropriate controls related to the current environment supporting the Information Functions and/or Processes, including those controls required by the Contract.

3.9.4 The scope of the SOC 2 Report shall include work performed by any subcontractors that provide essential support to the Contractor for the Information Functions and/or Processes for the services provided to the Department under the Contract. The Contractor shall ensure the audit includes all subcontractors operating in performance of the Contract.

3.9.5 All SOC 2 Audits, including those of the Contractor and any relevant subcontractor, shall be performed at no additional expense to the Department.

3.9.6 The Contractor and all relevant subcontractors shall promptly provide a complete copy of the final SOC 2 Report(s) to the Contract Monitor upon completion of each SOC 2 Audit engagement.

3.9.7 The Contractor shall provide to the Contract Monitor, within 30 calendar days of the issuance of each SOC 2 Report, a documented corrective action plan which addresses each audit finding or exception contained in a SOC 2 Report. The corrective action plan shall identify in detail the remedial action to be taken by the Contractor and/or subcontractor(s) along with the date(s) when each remedial action is to be implemented.

3.9.8 If the Contractor, including any relevant subcontract, currently has an annual information security assessment performed that includes the operations, systems, and repositories of the Information Functions and/or Processes being provided to the Department under the Contract, and if that assessment generally conforms to the content and objective of the Guidance, the Department will determine in consultation with appropriate State government technology and audit authorities whether the Contractor's and any relevant subcontractor's current information security assessments are acceptable in lieu of the SOC 2 Report(s).

3.9.9 If the Contractor and any relevant subcontractor fails during the Contract term to obtain an annual SOC 2 Report by the date specified in RFP Section 3.9.1, the Department shall have the right to retain an independent audit firm to perform an audit engagement of a SOC 2 Report of the Information Functions and/or Processes utilized or provided by the Contractor and any relevant subcontractor under the Contract. The Contractor and any relevant subcontractor agrees to allow the independent audit firm to access its facility/ies for purposes of conducting this audit engagement(s), and will provide the necessary support and cooperation to the independent audit firm that is required to perform the audit engagement of the SOC 2 Report . The Department will invoice the Contractor for the expense of the SOC 2 Report(s), or deduct the cost from future payments to the Contractor.
